LETTER FROM THE EDITOR

A RECENT INQUIRY led to University records showing that an appointment to a Government job by President John Adams brought together in Washington three students whose personal lives must have touched the development of literature in the United States.

The inquiry was from Mr. Jay Leyda of Amherst College, now engaged in research at the Folger Shakespeare Library on the Dickinson papers.

The appointee was the father of 13 children, the Hon. William Cranch of Boston, who was named Chief Justice of the Circuit Court of the United States for the District of Columbia.

In a University safe, a huge volume of hand written minutes shows that on February 3, 1826, the Board of Trustees of Columbian College (now The George Washington University) turned to Federal officialdom to elect Judge Cranch the first Professor of Law of the College. He and William Thomas Carroll, who was elected "the Second Professor" were "requested to prepare a System for the operation of that Department (Law), and report the same to this Board." Although the University Law School, now the oldest in the District of Columbia, was not organized until mid-century, Judge Cranch and Mr. Carroll continued in their capacity for a year or two.

On September 10, 1828, the Judge's youngest son, Christopher, was enrolled. He received the Bachelor of Arts in 1831.

Christopher Cranch has been described as a painter, critic, poet, and Unitarian minister. He received the Doctor of Divinity at Harvard University and preached in numerous cities. He gained some note by illustrating with comic drawings a volume of Emerson's *Essays,* and Emerson published several of Cranch's poems in the *Dial.* Christopher Cranch's monumental achievement was a translation of Virgil's *Aeneid,* but he also was known for writing Jenny Lind's "Farewell to America." He spent much of his later life in Rome, Florence, Paris, and New York, as a landscape painter. Perhaps it is pertinent to note also that he had dark, curly hair, delicately beautiful features, and a fine baritone voice; and that he played several instruments.

Christopher Cranch had a sister, Abbie Adams, who was married in 1837 to William Greenleaf Eliot, grandfather of the contemporary poet, T. S. Eliot.

William Greenleaf Eliot received the Bachelor of Arts from Columbian College in 1829. As founder and Chancellor of Washington University in St. Louis, he became known as a great educational leader. He was an early president of the public school board of St. Louis. Like Christopher Cranch, he proceeded from Columbian College to Harvard divinity school and served as a Unitarian

minister. He established the first Unitarian Society west of the Mississippi River.

His brother, Thomas Dawes Eliot, figured more prominently in University records as a student leader. He received the Bachelor of Arts in 1825 and the Master of Arts in 1829.

Thomas Dawes Eliot was a member of the Enosinian Society, college forensic group, and spoke at the University's first Commencement. This occasion "in Dr. Laurie's church" was attended by President Monroe, General Lafayette, the Vice President, a number of Cabinet officers and Members of Congress, and "a collection of female worth, of youth and beauty, which would reflect honor on any assembly."

Before this audience, young Thomas Dawes Eliot presented what a newspaper reporter called "a chaste composition." It was the salutatory address in Latin and an English oration on "the causes of the paucity of splendid productions of American genius in poetry, sculpture, and painting."

Eliot was listed as a member of the Enosinian committee which planned a program of Fourth of July orations. He was doubtless present when the group waited on General Lafayette, December 13, 1824, and were permitted to enroll both the General and his son as honorary Enosinians.

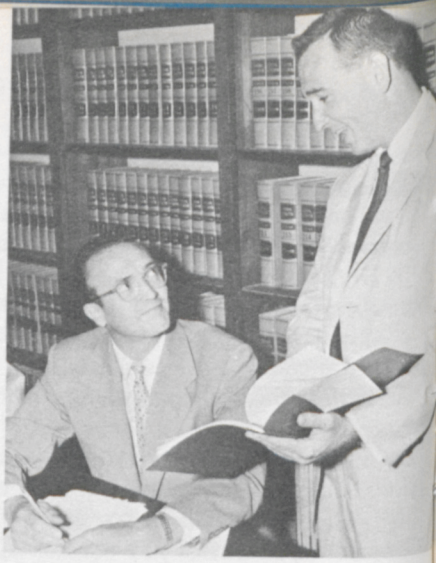

Thomas Dawes Eliot is said to have read law with his uncle, William Cranch, in Washington, and to have continued law studies in New Bedford. He later became a Member of Congress and was a close friend of Edward Dickinson. The two shared lodgings in May, 1854, when one of the founding meetings of the Republican Party was held in their rooms. Although Eliot became active in the new party and Dickinson held to the Whigs, the friendship continued. Thomas Dawes Eliot was from time to time mentioned in the correspondence between Edward and his daughter, Emily. This was the same Emily whose poetry later became the major claim to posterity of the then prominent Dickinson men.

There is no question that Judge Cranch's Federal appointment brought his children to Washington where Christopher shared with Thomas and William Eliot a curriculum requiring study of Homer's *Iliad,* calculus, astronomy, Stewart's *Philosophy of Mind,* Paley's *Evidences,* Butler's *Analogy,* and Vattel's *Law of Nations.* Students then were required to attend divine services. Merit books were kept by the faculty as regards their conduct. The Board of Trustees stated that ten dollars a year would "be quite enough as ought, in any case, to be allowed for pocket money." Those attending the College came from 21 of the 24 states and the District of Columbia, and 2 of the 7 professors had "visited Europe."

Margaret Davis

The Law Review:

THE FIRST TWENTY-FIVE YEARS

Mitchell S. Cutler (right), Editor-in-Chief of the Law Review for the coming academic year, confers with Faculty Editor-in-Chief Glen E. Weston, Associate Professor of Law.

The George Washington Law Review, a legal journal published by students of the University's Law School, completes this year 25 successful years of publication.

Issued 6 times yearly, the *Law Review* was established at the University in 1932 as the first university publication devoted exclusively to public or governmental law. This was a natural choice of subject matter, since the University is located in Washington, near the Congress, the executive department, important law courts, and many administrative agencies.

In an article in the *Federal Bar News,* Charles A. Hobbs, student Editor-in-Chief of the *Law Review* last year, stated, "The limited specialization of *The George Washington Law Review* has seemed admirably suited to secure most of the benefits of specialization, while yet giving student staff members a wide area in which to work, so as to follow their natural interests or to use the invaluable experience gained from past or concurrent employment in government or private enterprise."

Service to the legal profession through publication of significant legal research work is one of the basic objectives of the *Law Review.* However, the Law School faculty regards the ob-

jective of providing intensive research and writing experience to student staff members as the paramount purpose of the *Review*.

Some of the most outstanding graduates of the University served as editorial staff members of the *Law Review*. Charles S. Rhyne, a staff member in 1937, was recently elected President of the American Bar Association. Mr. Rhyne considers his service on the *Law Review* "the most valuable experience I had in Law School. It taught me how to find and use legal materials. Law students should not underestimate the value of law review experience. Anyone interviewing a young lawyer for a position generally asks first whether the applicant was on the law review of his school."

In addition to Mr. Rhyne, other prominent *Law Review* staff alumni include J. W. Fulbright, U. S. Senator from Arkansas; Frank H. Weitzel, Assistant Comptroller General of the United States; O. S. Colclough, Dean of Faculties and Acting Dean of the Law School of the University and former Judge Advocate General of the Navy; Vice Admiral Alfred C. Richmond, Commandant of the United States Coast Guard; and Robert E. Smylie, Governor of Idaho.

The *Law Review* has frequently devoted issues to symposia on specific areas of public law. To date, symposia have been published on Administrative Law; Antitrust Law; Atomic Energy Law; Constitutional Law; Federal Legislative Powers versus Trade Barriers; Government Contracts; Muslim Law; and the Proposed Administrative Court. Three special anniversary issues have been published. In 1937

Members of the University faculty and members of the Federal Trade Commission examined copies of the *Review* commemorating the Silver Anniversary of the Commission in 1940. Left to right: Professor John A. McIntire of the Law School; Commissioner Charles H. March; William C. Van Vleck, Dean of the Law School; University President Cloyd H. Marvin; Commissioner Robert E. Freer; Judge Ewin L. Davis, Chairman of the Federal Trade Commission; Professors J. Forrester Davison, Charles S. Collier, and S. Chesterfield Oppenheim of the Law School; and Commissioner William A. Ayres. Professors McIntire, Davison, and Oppenheim each served a number of years as Faculty Editor-in-Chief of the *Review*.

one acknowledged the golden anniversary of the Interstate Commerce Commission. Silver anniversary issues were dedicated to the Federal Trade Commission in 1940 and the Federal Power Commission in 1945.

The *Law Review* has from its beginning printed considerable material on Patent Law, and its excellence in this field was recognized last year by the Fletcher Foundation of Rosemead, California, which awarded its first prize of $500 to the *Law Review* for "the most outstanding presentation of articles, case notes, and reviews in the field of patents, published by student law reviews or other regular law school periodicals."

Contributors to the *Law Review* have included eminent legal authorities from both the United States and abroad. A few representative contributors are two former Attorney Generals of the United States, the late Homer S. Cummings and the late George E. Wickersham; Roscoe Pound, former Dean of the Harvard Law School; the late Robert H. Jackson, Justice of the U.S. Supreme Court; Harold H. Burton, Justice of the U.S. Supreme Court; Sir Hartley Shawcross, former Attorney General of England; the late Gifford Pinchot, former Governor of Pennsylvania; former Senator Burton K. Wheeler of Montana; Julius Stone, Professor of Jurisprudence and International Law at the University of Sydney, Australia; and Justin Miller, former Chairman of the Board and General Counsel of the National Association of Radio and Television Broadcasters.

Left: O. S. Colclough, Dean of Faculties of the University and Acting Dean of the Law School. A former Judge Advocate General of the Navy, Dean Colclough served on the staff of the *Law Review* as a Law undergraduate at the University. Right: Rear Admiral Chester Ward, USN, present Judge Advocate General of the Navy. Admiral Ward served for one year as the *Review's* Faculty Editor-in-Chief.

The George Washington Law Review staff believes that government lawyers or former government lawyers contribute more leading articles to it than to any other law school review in the country.

John Edgar Hoover, Director of the Federal Bureau of Investigation, and himself a contributor to the *Law Review,* stated in a letter to the *Law Review,* "I think that the editorial staff of the *Law Review* has done a grand job . . . I think it is serving a need which has not been covered by any other law review, in that its attention has been devoted primarily to administrative procedures and matters coming under Federal jurisdiction, which must be most perplexing to say the least to those who are not intimately connected or acquainted with them."

Plans for next year's *Law Review* issues are already well under way. The

first issue will feature an article by the late Dr. Wallace Parks, Chief Counsel to the Senate Subcommittee on Government Operations and Consultant to the Senate's Constitutional Rights Subcommittee, "Applying 'The Right to Know' under the Separation of Powers." Another article in the same issue, by Professor Bernard Schwartz of the New York University Law School, will review the American Bar Association's proposed Federal Administrative Code.

Another symposium will be included in the second and third issues of the coming year—on the regulatory functions of the Department of Agriculture. Statutes having a widespread economic effect, such as the Commodity Exchange Act, the Packers and Stockyard Act, the Sugar Act, and the Agricultural Adjustment Act of 1938, will be considered.

The University is justly proud of its student *Law Review* staff of the past 25 years. Dean of Faculties and Acting Dean of the Law School O. S. Colclough says, "Law Reviews play a vital role in the affairs of the nation's law schools in many ways. There is the contribution to the education and training of the law students who are fortunate enough to participate. The Law Reviews constitute an intrinsic part of the educational programs of their respective schools. No less important is their part in the function of service to the profession. In all these ways, and others less tangible, *The George Washington Law Review* has fulfilled the aspirations and ideals of the administration and faculty at its inception, and the hopes and ambitions of faculty members and students who have rendered dedicated service to it through the years. To all these individuals the University is indebted."

—JOHN S. TOOMEY

The *Law Review* staff in 1942, the tenth anniversary of publication. Seated, Professor John A. McIntire, Faculty Editor-in-Chief, and student Editor Jack N. Hays. Standing, left to right, student Editors Thomas N. Dowd, Orel D. Orment, Samuel L. Welt, and Joseph Goldberg.

Historical Records Research

UNITED STATES ARMY commanding officers soon will be assisted in making decisions by results of a four-year study of the effect of environment on men and materiel.

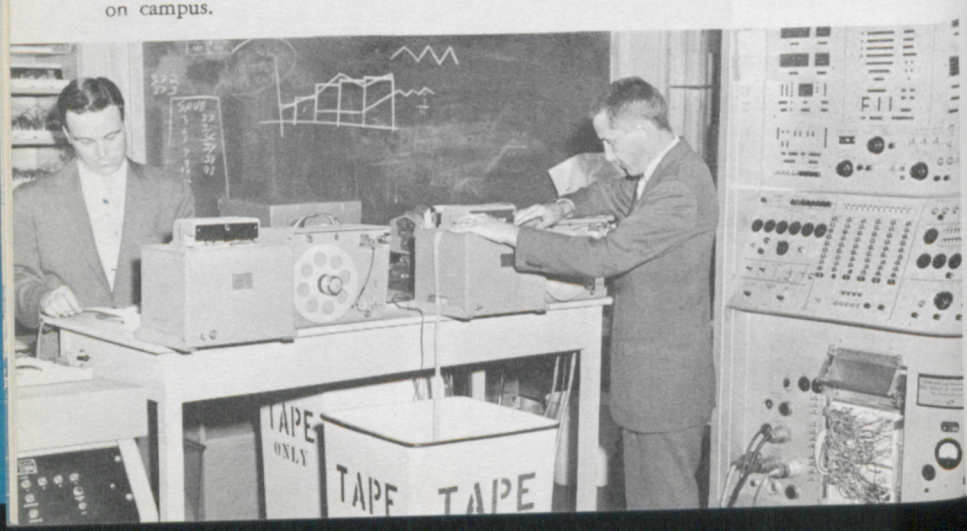

This study, which is near completion at the University, has involved reading 22,000 of approximately 167,000 pertinent Army records and screening nearly 75,000 more.

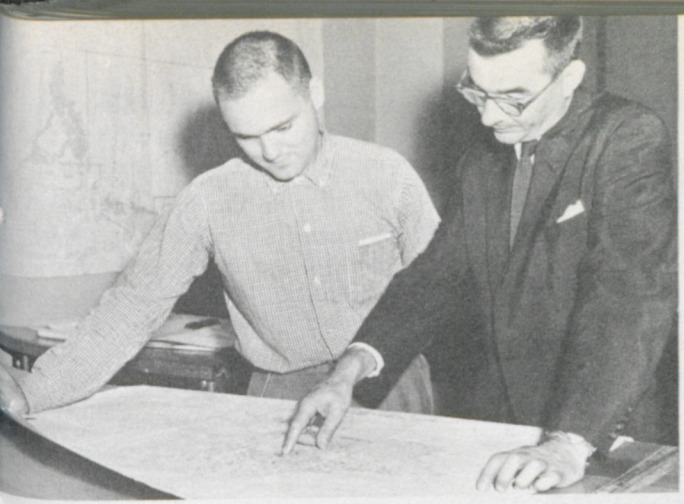

During the course of this study, the project staff became the "best customer" Army files custodians at the Federal Records Center in Alexandria had ever had.

Their mass reading and evaluation project was designed to determine the nature and magnitude of effects of environment on military operations, using as sources of information the military records of World War II. Seven separate reports will be completed this month to enumerate the findings of researchers.

The study is known as the Historical Records Project and has been pursued as an Army contract under the jurisdiction of the University School of Engineering. Engineering Dean

Norman R. Mason (*left*) and Charles Hesaltine, Research Associates, process answers which the logistics computer has put on tape. The answers in this case synthesize thousands of pieces of information about the efficiency of a military operation in a given location. The computer is located in the Navy Logistics Research Projects laboratory on campus.

Profs. Chester McCall, Consultant, and Robert D. Campbell, Principal Investigator, examine a map showing the areas where project data was collected.

Martin A. Mason was asked to originate the project as a pilot study in the summer of 1953. He asked Prof. Robert D. Campbell of the University Department of Geography to become Principal Investigator in the Fall of 1953, and Professor Campbell has continued in that post.

Although specific findings of the study are for Army use only, it can be said that investigators reported that soldiers are affected principally by environment by not being able to see what they need to see. Fatigue, discomfort, or disease are much less important results of environment.

Investigators found that observation was one of the most important functions of military personnel, and that interference with this function by such environmental stresses as low atmospheric visibility, terrain, or vegetation, usually had a corollary effect on the operation in question.

It was found that the effect of environment may differ markedly in the same location but with different military operations. Some operations seem not to be affected by environment, whereas some are very susceptible to environment. An imposing variety of environmental elements such as sand, snow, orchards, potable water, landslides, shadow, caves, urban patterns, clouds, and the soldier's time honored acquaintance, mud, were considered in the study.

Evaluation of this complex information resulted in the use of a battery of procedures, including some unique ones.

It was first necessary to sample various categories of military documents to decide which would contain the most useful information for this survey. Since the Army alone has retained millions of documents from World War II, this in itself was a considerable undertaking.

When it was determined that the

Federal Records Center documents would be most useful, arrangements were made to ship truckloads of filing cases of records to University workrooms.

How to collect and store data from these records in a usable fashion was approached by the compiling of a 181 page Coding Handbook. To do this each unit of information to be used in the survey was broken down into components. Each component was classified. Then the entire system was translated into numerical codes. This permitted punch card and tape "storage" of information and eventual machine analysis.

Sixteen different classes of information were designated as significant in terms of environment which had effect on military operations as shown by records of World War II in all its areas of operation. These included such classifications as Operations, Functional Descriptions of Materiel and Personnel, the Environmental Element, the Environmental Effect, and a Measure of the Magnitude of Effect.

Some classifications were developed for the first time. A functional descriptive classification of military operations was developed for the first time, so far as is known.

Classes of information were translated into numerical codes totaling 37 digits, plus one letter code. Most of these codes were flexible and "open ended," which means subtopics could be added where necessary. It was this complicated coding structure that made it possible for readers for the project to put data in usable form.

When more than 9000 "incidents" of environmental impact had been culled from military records of the Mediterranean and European theaters, it was felt that these constituted enough data for analysis. The objective of the analytical procedure was to study the relationships among the various "elements" of the problem for the purpose of developing some logical structure. With such a structure, of course, applied predictive devices could be developed for Army use.

Analysis was begun in June, 1956. This analysis, which because of the multiplicity of data made much use of the Logistics Computer (GWU-ONR Navy Logistics Research Project) and of the IBM laboratories of the University's Human Resources Research Office, has led to the development of two "models," a mathematical model and a statistical model.

New Dormitories

The University recently purchased two buildings for use as dormitories. A residence hall for men, John Quincy Adams Hall, is located at 19th and H Streets, N.W. Dolly Madison Residence Hall for Women, at 22nd and H Streets, N.W., will be available only to full-time women students.

HONORARY DEGREES

Three alumni of the university were awarded honorary degrees of Doctor of Laws at June Commencement.

Newell Windom Ellison

Son of The George Washington University; man of genuine friendliness in whom Christian character and understanding are not to be separated; patron of education and of culture, as attested by his splendid services to his George Washington University; able lawyer and trustworthy servant of this community of which he is a vitalizing part; conservative leader manifesting steadfastness of purpose and thoughtful consideration during an uncertain political era when loyal comprehensions and discriminating actions only can protect our social growth.

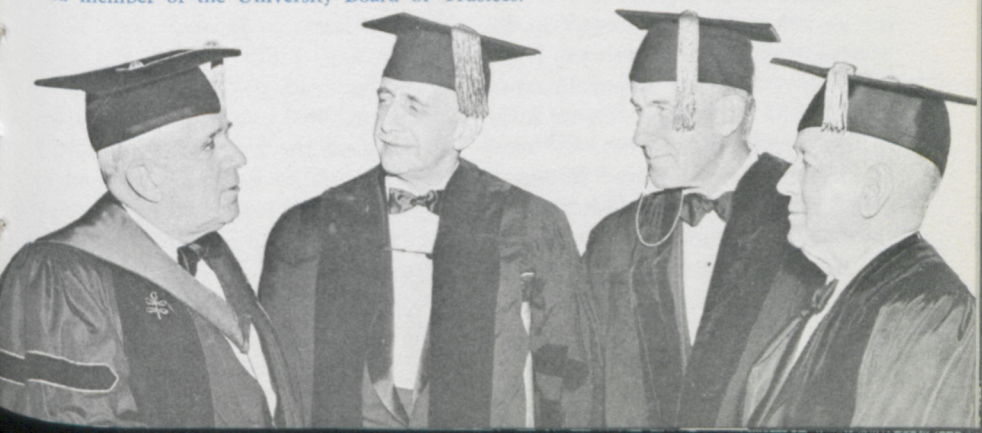

Robert Clement Watson

Graduate of Lehigh University and of The George Washington University; diligent in his chosen profession; presently ably serving as United States Commissioner of Patents. The stature and mould of his life speak of strength in friendship and idealism in public service, that makes for worthiness in social stewardship; a very real personality.

Philbrick McCoy

Graduate of the Law School of The George Washington University; his service to his University is marked by splendid enthusiasm and significant loyalty; as a lawyer he is a scholarly interpreter of social bases and meanings of the law; as a jurist he understands the eternal significance of justice and believes in the power of the intellectual and the spiritual elements in life; under all our variant concepts of service, a complete citizen.

University President Cloyd H. Marvin congratulates Judge McCoy of the Superior Court, Los Angeles; Commissioner of Patents Watson; and Mr. Ellison, Washington attorney and member of the University Board of Trustees.

Mrs. Fotouhi plays the *koto,* Mr. Fotouhi the bamboo flute.

American in Hiroshima

Thanks to the outstanding work of a 1950 graduate of The George Washington University, a small area of the world which was only four years ago a hotbed of hostility and resentment toward the United States has been transformed into a symbol of friendship between two nations—Japan and the United States.

Fazl Fotouhi became Director of the American Cultural Center in the bomb-scarred city of Hiroshima, Japan, in 1952. As the first American representative of the United States Information Service in the city, he found considerable suspicion and frequently actual hatred of things American by the local population. His daughter, Farida, was called *baka* (stupid idiot) by Japanese schoolboys who threatened to beat her with sticks.

From the beginning, however, Mr. Fotouhi's actions began to arouse a feeling of admiration among the Hiroshima residents. One of the first accomplishments toward winning favor among the people resulted from his not being able to find a suitable house for his family. He purchased one and rebuilt it himself. He enrolled his daughter, who knew no Japanese, in a Japanese school. Little Farida, then only seven years old, proved to be as adept at international relations as her father. She learned the language and became skilled at sword fighting and at playing the koto (harp). By this year, she had won prizes for excellence in Japanese composition.

Mrs. Fotouhi, the former Agnes

Ryman of Bridgeton, North Carolina, and also a George Washington graduate, joined the family's efforts toward international good will by learning to play the *koto,* and by teaching a course in nutrition. She also gave English lessons to the widely-publicized Hiroshima maidens before they came to this country for plastic surgery.

Under Mr. Fotouhi's direction, the American Cultural Center became a significant part of Hiroshima's life. He more than doubled the number of volumes in the library, arranged for more than 2,000 showings of documentary films, sponsored concerts, a Japanese-American folk dance program, and seminars on American culture. He even played Santa Claus for the local orphanages, and also found time to give English lessons, lecture at the University, and arrange for a number of scholarships for Hiroshima students to American colleges and universities.

Farida Fotouhi plays the *koto.*

Mr. Yamamoto, President of Chugoku Press, received Atoms for Peace stamps from Mr. Fotouhi.

Mr. Fotouhi, Iranian born and a descendant of the rulers of the Kajar dynasty of Persia, has been interested in international affairs most of his life. At George Washington, he was Vice President of the International Relations Club. He was naturalized in 1943, and is an Army veteran of the New Guinea campaign of World War II. He joined the staff of the State Department in 1947.

The Fotouhis returned to the United States in May of this year, but not without protest from the city of Hiroshima. A newspaper editor suggested that the Fotouhis be made honorary citizens of the city, and city officials requested that they be allowed to stay longer, since, "He has done more than any other person could ever have done in the interest of the better and fuller understanding between our two great nations."

TRAINING OFFICERS' LUNCHEON

Officials of the University's School of Government recently held a luncheon meeting with Government Training Officers who serve as advisers to their respective agencies' Management Intern Scholars at the University.

The University awards each semester fifty scholarships to members of management intern programs of federal departments and agencies, to assist the Government in the training of carefully selected young men and women who are in programs which emphasize development of administrative leadership for the career service. The program enables the intern to supplement his everyday, on-the-job training with appropriately selected after-hours courses.

Opposite, front left, Miss Lillie Swinea, Training Officer, Career Development and Training Branch, Staff Civil Personnel Division, Office of the Secretary of the Air Staff, Department of the Air Force.

Second row, left to right, Mr. Carroll M. Cornelius, Training Officer, United States Information Agency; Dr. James C. Dockeray, Professor of Finance at the University; Mr. William B. Morris, Chairman of the Administrative Development Committee, Office of the Adjutant General, Department of the Army; and Mr. Byron O. Stearns, Assistant Chief, Staff Development Branch, International Cooperation Administration.

Third row, left to right, Miss Constance Ewy, Research Psychologist, Civilian Personnel Division, Office of the Adjutant General, Department of the Army; Dr. David Brown, Professor of Public Administration at the University; Mr. Herbert Hubben, Associate Professor of Public Administration at the University; and Mr. Robert H. Grant, Chairman of the Training Committee, National Institutes of Health.

Fourth row, left to right, Mr. Berton B. Moyer, Jr., Special Projects and Training Officer, Personnel Division, Office of the Secretary of Defense; Dr. Arthur E. Burns, former Dean of the University's School of Government and now Chairman of the Graduate Council of the University; Dr. Karl Stromsen, Chief, Branch of Training, Division of Personnel Management, Office of the Secretary, Department of the Interior, also Professorial Lecturer in Public Administration at the University and formerly the University's adviser on Government Intern Scholarships; and Mr. Roland Rush, Training Officer, Division of Personnel Management, Office of the Secretary, Department of the Interior.

Fifth row, left to right, Mr. George D. Thomas, Director, Navy Management Development Programs, Administrative Office, Department of the Navy; Dr. Alfred B. Obern, Assistant Professor of Public Administration and Adviser on Government Intern Scholarships at the University; and Mr. Robert J. Foster, Assistant to the Director, Navy Management Development Programs, Administrative Office, Department of the Navy.

Dean of Faculties and Acting Dean of the Law School O. S. Colclough (*right*) greets Panelists Wasilewski, Brucker, Tinkham, and Holtzoff.

LAW DAY

The University's Third Annual Law Day, held in May, featured a panel discussion on whether Canon 35 of the Canons of Judicial Ethics of the American Bar Association should be amended. Canon 35 prohibits . . ."The taking of photographs in the court room, during sessions of the court or recesses between sessions, and the broadcasting or televising of court proceedings. . . ."

Participants favoring retention of the canon were the Honorable Alexander Holtzoff, Judge of the United States District Court for the District of Columbia, and Mr. Richard P. Tinkham, Chairman of the American Bar Association Committee on Public Relations and a member of the Association's Bar-Media Conference Committee on Fair Trial-Free Press. Advocating a change in the canon were Mr. Herbert Brucker, Editor of the Hartford *Courant* and Chairman of the Freedom of Information Committee of the American Society of Newspaper Editors, and Mr. Vincent T. Wasilewski of the National Association of Radio and Television Broadcasters.

During the discussion, a number

of photographs were made by Washington *Post & Times-Herald* photographer Arthur Ellis without the knowledge of most of the audience and panel members, demonstrating that with modern photographic equipment it is possible for cameramen to make pictures unobtrusively and without disconcerting those being photographed.

Law Day also included finals of the Van Vleck Case Club Competition for Law students, a luncheon with Mr. Justice Burton of the U. S. Supreme Court as guest of honor, and the annual Law Day Ball in the evening.

Mr. Justice Burton
Honor Guest

Judges Alexander Holtzoff of U. S. District Court and Wilber K. Miller, U. S. Court of Appeals, and Representative John J. Rhodes of Arizona, selected Moot Court winners standing behind them. *From left,* Charles A. Hobbs, 3rd place; P. Phillips Connor, 2nd place; Gordon S. Thatcher, 1st place; and William F. Beemer, 4th place.

Graduates

Graduates of the Navy Comptrollership Class who received the Master of Business Administration pose at Constitution Hall with Chairman Arthur E. Burns of the Graduate Council and Prof. Arlin Rex Johnson.

Below, left to right, Representative Charles A. Halleck of Indiana, House Minority Whip, and his son, Charles W. Halleck, who received the degree of Juris Doctor; Mary Susan Hull (Mrs. Floyd Hudson), who received the degree of Bachelor of Arts, her father, Representative William R. Hull of Missouri; and George Coulter, son of E. H. Coulter, Chief Counsel, Urban Renewal Section, Legal Division, Federal Housing Administration. George Coulter also received the degree of Juris Doctor.

Coast Guard Lieutenants Harley Earl Dilcher and George Herbert Weller received the degree of Juris Doctor, awarded for exceptional scholarship and writing by undergraduate law students. Previously they were classmates at the U. S. Coast Guard Academy.

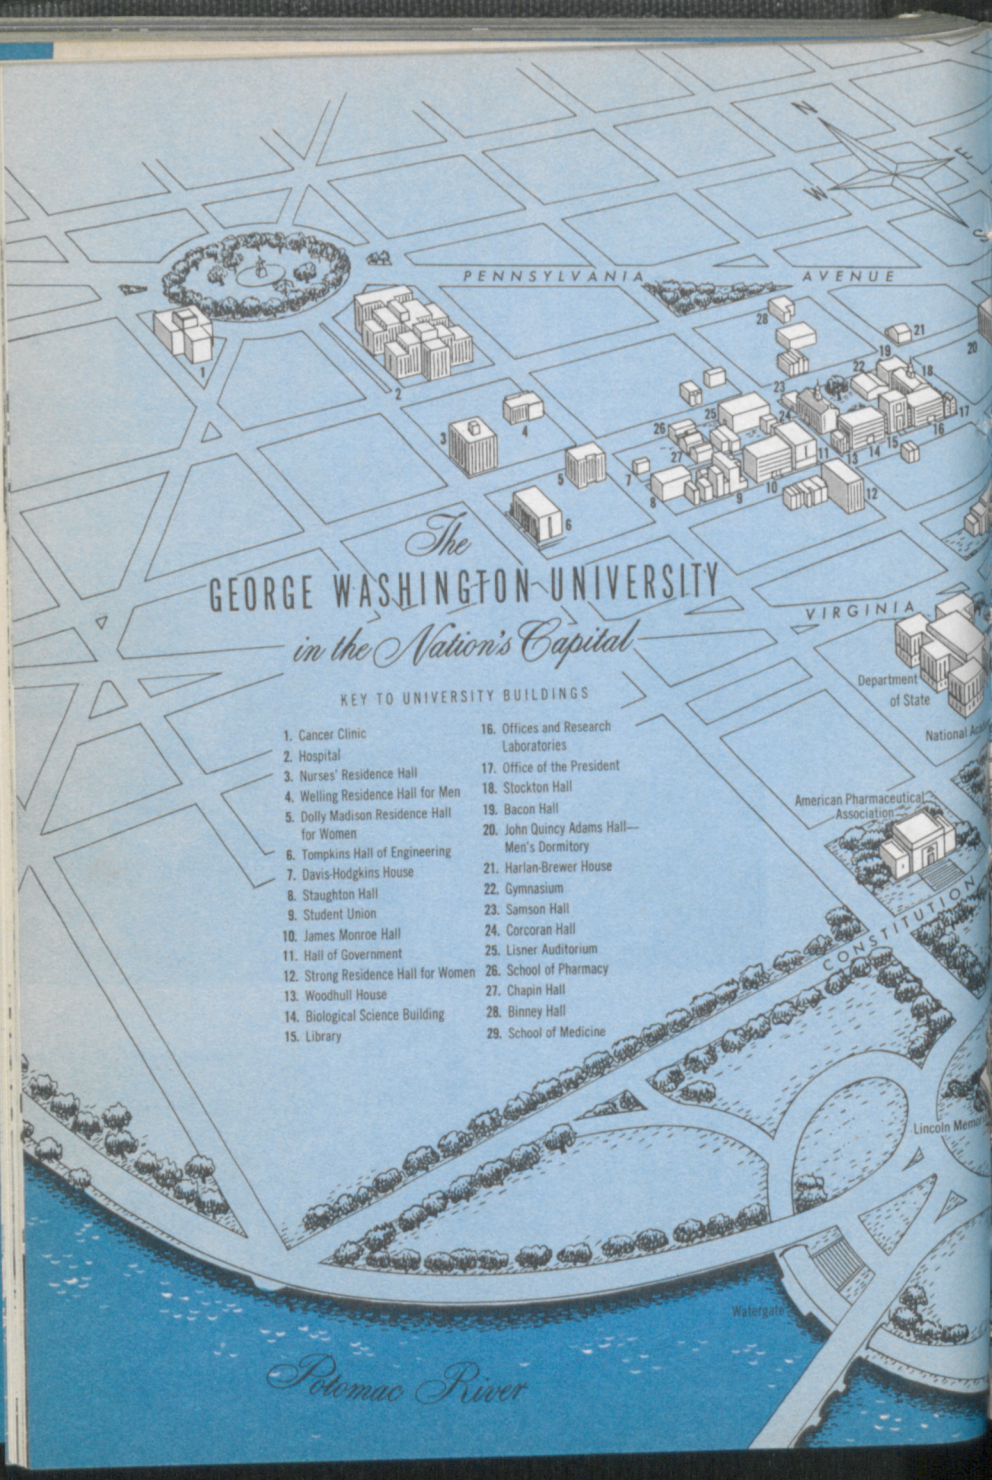

John William Gynne, Jr., is congratulated by his father, Chairman John William Gwynne of the Federal Trade Commission, upon receiving the degree of Bachelor of Laws.

Dean of Faculties O. S. Colclough congratulates Commdr. and Mrs. Louis J. Papas, who received respectively the Bachelor of Arts in Government with distinction and the Bachelor of Arts in Education.

Mrs. Louise Curtis Erana MA in Ed 57 is congratulated by her husband, Col. Mariano A. Erana LL M 19 and MPL, 20 (National), who was Judge Advocate General of the Philippine Army of Liberation and member of the Philippine Cabinet. With them (*center*) is Chairman of the Philippine Red Cross Manuel Lim.

APPOINTMENTS

MRS. VERDA WHITE BARNES EX 37, has been appointed to the Washington staff of Senator Frank Church (D-Idaho).

JUDGE NATHAN CAYTON LLB 18, LLM 19, has been made assistant to the chairman of the Attorney General's Conference on Court Congestion and Delay in Litigation.

ALBERT C. CREW MA 41, has been named treasurer of the Federal Home Loan Bank of Cincinnati.

CHARLES L. GRANT EX 37, has been appointed the new Director of the Department of Agriculture's Office of Budget and Finance.

ORVAL HAFEN EX 28, has been elected president of the Utah Senate.

G. OSMOND HYDE LLB 26, has been appointed the new chief of the United States Department of Agriculture office of Hearing Examiners.

CATHERINE B. KELLY JD 51, was nominated by President Eisenhower to fill one of vacant judgeships on the Municipal Court bench of D. C.

JOSEPH McKAY LLB 50, has been named an assistant attorney general in Boston, Mass.

GEORGE M. MOORE AB 37, LLB 40, has been appointed Counsel of House Committee on Post Office and Civil Service.

SEYMOUR PODNOS BS 37, has been appointed special assistant to the Deputy Assistant Secretary of Defense for Research and Engineering.

GEORGE L. POWELL AB 38, LLM 42, has been appointed special assistant to General Counsel Jerome D. Fenton of National Labor Relations Board.

THOMAS A. SCHRADER EX 56, was named director of the South Dakota Game, Fish and Parks Department.

GUSTAVE SHAPIRO BEE 56, has been named Chief of the Engineering Electronics Section of the Electricity and Electronics Division at the National Bureau of Standards.

M. MILES SNIDER EX 34, has been appointed Seventh District Legislative Liaison Representative for Congressman Thompson of the Seventh District, Louisiana.

DAVID WATSTEIN AM 40, has been appointed chief of the structural engineering section of the Building Technology Division at the National Bureau of Standards.

CARROLL L. ZIMMERMAN, who worked at the University under the famous nuclear scientist, Dr. Edward Teller, has been appointed to provide guidance and advisory service to SAC's Commander-in-Chief on scientific and related technical programs effecting the mission and operation of the Strategic Air Command at the Offutt Air Force Base, Nebraska.

Chester A. Matthes, Senior Scientist at Minitrack Station in Havana during the International Geophysical Year, is congratulated on completing training at Naval Research Laboratory by Capt. E. M. Day USN Director of Administration.

Federalites

The following University graduates have recently become employed as patent examiners with the U. S. Patent Office: PERRY CARVELLAS BS 52, SAMUEL MATTHEWS BS 55, and MICHAEL SILEO BS 57.

HONORS

ROBERT BEACH BA 37, has received an award from the United States Department of Agriculture's Commodity Stabilization Service.

ANTHONY RICHARD DeFELICE AB 32,, JD 37, has received an honorary award for "vigorous leadership in advancing the interests of American agriculture and for promoting and helping to achieve liberalization of foreign trade controls through effective staff work at national and international levels." He is deputy assistant administrator, FAS Agricultural Trade Policy and Analysis, and is a specialist in international trade agreements at the United States Department of Agriculture.

ROBERT T. O'CONNOR BS 38, was presented an award in recognition of his work in the development of new and highly improved methods of analysis on new and expanded uses of fats and oils. He works for the United States Department of Agriculture.

OTHERS

SAMUEL CUMMINGS AB 49, runs one of this country's most unusual businesses —buying and selling surplus guns. Through his three outlets, the largest being the International Armament Corporation located in New York and two in the Washington area, he supplies weapons to everyone from Alaskan whale hunters to an impressive number of South American and West European governments.

FRANKLIN KNOCK LLB 22, won a free trip to Mexico for himself and his wife through the Travel Agents' guessing contest. He is a member of the anti-trust division of the Department of Justice.

Marine Corps Corporal William J. Kitchen, an evening student in Art at the University last year, presents General Randolph McC. Pate, Commandant of the Marine Corps, with a colored ink portrait that he made for Mrs. Pate during his off-duty hours. Corporal Kitchen has been accepted in the Navy ROTC program to prepare for a Navy or Marine Corps Commission. He attended the Naval Preparatory School in Bainbridge, Maryland, this summer.

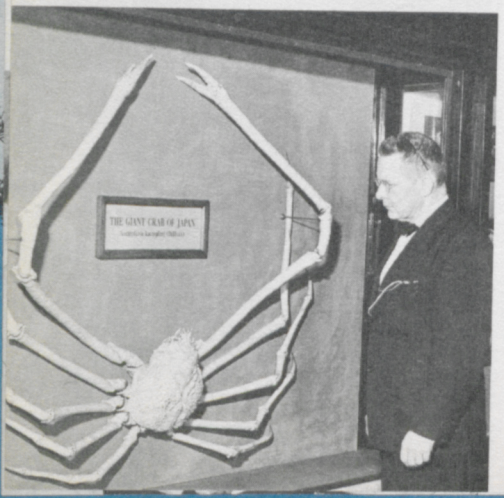

MARTIN G. MANCH III EX 36, American Consul in Cairo, Egypt, his wife and their four children were the last family of Americans who were evacuated from Cairo during the recent outbreak of fighting. He is on emergency leave from the Foreign Service due to the illness of their six-month-old son. They now live in Staunton.

CLIVE W. PALMER LLB 23, LLM 23, MPL 23, BS 25, DCL 26, will supervise the newly established Executive Office for United States Marshals as a part of the office of Deputy Attorney General.

STANLEY M. SEGAL BS 45, of the U. S. Army Corps of Engineers' Research and Development Laboratories, Fort Belvoir, is scheduled to leave May 31 for Europe to study light source technique and to attend a conference on gaseous electronics.

—MARIAN GUDIM

Dr. Waldo Schmitt, who received his Ph.D. degree from George Washington in 1922, has retired as Head Curator of Zoology at the Smithsonian Institution. Shown above with an exhibit at the U. S. National Museum, Dr. Schmitt has studied marine zoology for the past 50 years, and has traveled to the Straits of Magellan, the Aleutians, the Belgian Congo, and the West Indies. Specimens from those trips have greatly enhanced the National Museum collections.

Buff and Blue

George Washington's old army uniform has at last been regimented.

The George Washington University, whose interest in facts about George Washington is understandable, announced on Washington's birthday that it has had standard industrial color code numbers assigned to the "Buff and Blue" of the uniform that Washington wore when he resigned his command of the Continental Army in December, 1783, in Annapolis, Md.

The University needed a standard notation of the colors for their publications, flags, and uniforms, which are also "Buff and Blue," the University colors since 1905.

In 1932 the George Washington Bicentennial Commission agreed upon the colors of Washington's 1783 uniform as those to be called "George Washington Blue" and "George Washington Buff." The uniform which served as source material for both the University and the Commission is in the costume collection of the National Museum in Washington, D. C., so the colors are authentic and historically accurate.

The "Buff and Blue" were registered as the University colors with the Color Association of the United States, Inc.; and The Munsell Color Company of Baltimore, Md., assigned notations to each color from their scientific system of describing colors in terms of value, hue, and chroma.

GW Royalty

Cherry Blossom Princess Susan Hull AB 57 is admired by Senator Stuart Symington of Missouri, and her father, Representative William Hull of Missouri.

University Queen of International Night was Afsaneh Sepahpour of Iran (*standing, left*). Other queen candidates were Brigitte Grimal of France, Ellen Soyang Kim of Korea, Deanna Bau of China, and seated, Nadia Ehsan of Egypt, Marguerita Ferro of Cuba, and Hahed Ehsan of Egypt.

Frank A. Howard, President of the Sloan-Kettering Institute for Cancer Research, addresses the Conference's dinner meeting. Present at the head table were officers, members of the Advisory Council, and members of the Area and National Committees of the Foundation and their wives.

Patent Conference

The University's Patent, Trade-Mark, and Copyright Foundation held its first Public Conference in June at the Shoreham Hotel in Washington. The day and a half meeting, which was attended by industrialists, attorneys, scientists, inventors, economists, statisticians, sociologists, psychologists, government officials, and others interested in the patent system—a representation of some of the most important researchers in the country—was eminently successful. Those in attendance at the final discussion stated that the quality of the research presented was of a uniformly high standard, and that the participants were both informed and informative.

The Foundation is engaged in a comprehensive study of the patent,

At the Panel Discussion of the Foundation's project on Patent Utilization *left to right,* Jacob Perlman, Study Director for Surveys at the National Science Foundation; W. Duane Evans, Assistant Commissioner, The Bureau of Labor Statisitics, Department of Labor; Barkev S. Sanders, Research Associate for the project; Joseph Rossman, Principal Investigator for the project; Willard C. Asbury, Vice President of the Esso Research and Engineering Company, Conference Moderator; and P. J. Federico, Examiner-in-Chief of the Board of Appeals of the U. S. Patent Office.

trade-mark, and related systems in the United States. The first conference followed the publication of the first issue of the Foundation's *Patent, Trade-Mark, and Copyright Journal of Research and Education,* which included final and interim reports of the Foundation's first research projects.

A *Supplement* to the first issue of the *Journal,* to be published in the fall, will include a summary and an edited transcript of the proceedings of the Conference, together with additional notes.

Among the reports presented at the Conference were studies of the effect of anti-trust decrees involving patents as a major factor; the effect of patents on the iron and steel industry; patent utilization; the effect of patents on the custom heat-treating industry; and the value of the patent in the United States.

The conference was very capably moderated by Willard C. Asbury, Vice President of the Esso Research and Engineering Company, and O. S. Colclough, Director of the Foundation and Dean of Faculties of the University.

Principal speaker for the dinner meeting was Frank A. Howard, President of the Sloan-Kettering Institute for Cancer Research and a member of the University's Board of Trustees. Mr. Howard advocated the establishment of a permanent Government conciliation office to operate in the patent-antitrust area.

Fulbright Grants

Fulbright grants have been awarded three University graduates:

Sylvia D. Feldman AB 57, to study French modern theatre in France for one year, first at the University of Toulouse and later at the University of Paris. Miss Feldman majored in Education with a specialty in English, was a member of Phi Beta Kappa and president of the University chapter of Future Teachers of America.

Louis P. Munan AB 48, MS 50, and an Associate in Physiology on the University faculty, to lecture in medical statistics at the University of San Marcos in Lima, Peru. Mr. Munan served as Chief, Research and Development Section, Office of the Army Surgeon General from 1951 to 1956 and prior to that as research Analyst, The National Academy of Science-National Research Council and in the U. S. Army Medical Corps. A frequent contributor to medical publications, he has recently completed research on a project to investigate aspects of sleep mechanism.

Rosa Dahl Wiener, AB 56, who completed the Master of Arts in teaching at Radcliffe College this Spring, to study the German language in Berlin and serve as an assistant teacher of English at Berlin-Erich Hopener Schule, Free University of Berlin. She held a four-year scholarship at the University, was a member of the Student Council and the Panhellenic Council.

Fall Classes

A number of new courses will be offered in the various departments of the University in the Fall Semester.

In the Department of Business and Public Administration "Management Communication," a course which was tried successfully in a service program (The Air Force Advanced Management Program) is now being made available to students at the University. It is described as a survey course in the problems of communication which will consider written communication, style and format, oral communication, oral briefing and presentation, group leadership, rapid reading, and completed staff work. The new course, "Advanced Management," will emphasize the principles of management in relation to business enterprise. The "Seminar in Personnel Management," offered for the first time, represents a rounding out of the program in the substantive fields of business administration.

"Security Analysis" is being given in response to the many requests for further studies in this field. Dr. Felix I. Shaffner, Professorial Lecturer in Business Administration, a well known investment specialist and security analyst with the brokerage house of Auchincloss, Parker and Redpath, will teach the course, which will include systematic analysis of methods of selecting investments and application to particular cases from the individual's point of view.

"Comparative Administrative Systems" is being added to the curriculum to round out the University's program in Public Administration. The course

Judge Godfrey L. Munter of the Domestic Relations Branch of Municipal Court and a University Trustee, addresses a class in Domestic Relations at the Law School.

George Washington and Georgetown University Air Force cadets pose before a transsonic wind tunnel at the Arnold Engineering Development center near Tullahoma, Tenn. The cadets made a two-day visit to the center which is designed to test airfoil models and materials.

will present an examination and analysis of the administrative systems of the major foreign governments with particular attention to practices applicable to administration in the United States. Dr. Alfred G. Obern, Assistant Professor of Public Administration, who will teach the course, hopes to bring in several foreign experts on the administrative systems of their particular countries drawn from embassies and visiting Fulbright scholars.

In the School of Education "Teaching Secondary School English" is being established in an effort to give teachers a refresher course in content in English and to make suggestions as to method.

Students in the University's course in Business Management visited the AFL-CIO headquarters building to hear an address by AFL-CIO head George Meany on labor-management relations. Seated at Mr. Meany's left is the professor of the class, Alfred G. Obern, Assistant Professor of Public Administration.

Approximately 75% of all the doctoral graduates of The George Washington University are now in the field of teacher education, and to aid this group and others a new course, "Teacher Education", will be offered for the first time this fall. The purpose of the course is to prepare people to take positions in the field of teacher education and to aid persons already in the field.

The School of Engineering is following the policy of keeping the teaching material as up to date as possible to reflect the continuing developments in the field of engineering. An example of this is the substitution of "Theoretical Thermodynamics" and "Heat Transfer" for the usual applied thermodynamics course. There is a substantial increase of the level in mathematics and physics requirements, for example the requirement that mechanical engineers have training in nuclear reactors theory as a reflection of the impact of the atomic age on the field of engineering. In Electrical Engineering another example of the development of the curriculum is the introduction of the study of automatic control systems and the strengthening of the course work in electrical circuit theory and electromagnetic wave phenomena.

In the Department of Geology a new course, "Geochemisty," will be offered in the Fall Semester. The course,

Three of 25 young French labor leaders are shown studying English in the University language laboratory. They were brought to the University by the U. S. Department of Labor to learn about the labor movement of the United States. Students were selected in France by United States officials of the International Cooperation Administration and the American embassy.

Howard Gill, Director of the University Institute of Correctional Administration, greets Senator Wayne Morse of Oregon, speaker, and Chaplain Alla W. Robertson, Administrative Command, Great Lakes Naval Training Center, at the Convocation of the 11th Institute held this spring.

described as a comprehensive study of the principles and laws of geochemistry pertaining to the abundance, relationships, and distribution of the elements in the various rock and mineral species, will include discussion of possible new sources for some of the rare elements.

A course not offered previously in the Department of Mathematics is "Numerical Analysis."

In the Department of Political Science "Current Problems in Domestic Politics" is being offered for the first time this fall. "Current Problems in International Politics" will be relatively the same type of course in the field of international politics.

In the Department of Religion the University has announced the establishment of a program of study leading to the degrees of Master of Arts in Religion and Master of Arts in Religious Education. In connection with this program two new seminars are being offered in the fall. They are "Seminar in Biblical Literature" and "Seminar in Religious Education."

A program of study leading to the degree of Master of Arts in Speech Correction has been announced by the University, and degree candidates having the necessary prerequisites will be accepted for the Fall Semester.

Two new courses are being given by the Department of Statistics. "Factor Analysis" has a dual purpose: first, to give students some historical background and current techniques in factor analysis, and second, to give an introduction to the mathematics of factor analysis at the undergraduate level. "Statistical Information Theory" is the second new course. Its purpose is to gather together the use of information theory in application to problems of statistics.

Student Career Conference Chairman Ed Crump and Ray Garcia enjoy chatting with their keynote speaker, Senator Hubert Humphrey of Minnesota.

'Grass-roots Ambassadors' Needed

"Young men and women willing to serve their country abroad as 'grass-roots ambassadors' are urgently needed to support our country's international role as a leader of the free world," Senator Hubert H. Humphrey, a member of the Senate Foreign Relations Committee, declared in the keynote address at The George Washington University's 7th Annual Career Conference held at the University's Lisner Auditorium in April.

Senator Humphrey made two major proposals: the establishment of a Foreign Service Academy, designed to provide a regular flow of career diplomats to the Foreign Service; and the commencement of a scholarship program to provide specially-trained economic and technical assistance personnel, to intensify and broaden American efforts to help other peoples help themselves through economic and social development. "We need more young people trained in diplomacy, with a broad liberal arts background, to invigorate our posts abroad," Senator Humphrey stated. "But we also need young people who go abroad armed with technical knowledge, trained to get across practical ideas on sanitation, nursing, on farming, engineering, and construction methods, to people at the neighborhood and village level. We need young people who can speak the language of the region and understand the customs and mores of the people with whom they are working."

The Career Conference is an annual event at the University. On this occasion experts from the various professional fields talk to forums of students about specific career possibilities.

Mrs. Shott Certifies Secretaries

Mrs. Mildred Shott, Associate Professor of Secretarial Studies, has been named a member of the Institute for Certifying Secretaries of the National Secretaries Association. The appointment is for three years.

In addition to administering the campus program leading to the Associate in Arts degree, Mrs. Shott directs a program of classes in Government agencies as part of the University's College of General Studies offerings.

Miss Mary Kerr AB 18, AM 25, has probably answered at least 350,000 questions since she took over the Information Desk at the State Department 14 years ago. The former principal of Gunston Hall School for Girls in Washington, Miss Kerr is shown below with Jane Lingo AB 46 who was in Gunston Hall's graduating class of 1942, the year the school closed.

GW Leads Nation in Foreign Service

The George Washington University has more graduates engaged in public affairs through international service than any other college or university in the country, according to the most recent *Biographic Register* published by the Department of State.

Approximately 700 George Washington alumni are ranking personnel in the Department of State, the U. S. Foreign Service, the International Cooperation Administration, the U. S. Information Agency, and the Foreign Agricultural Service.

The University has from its beginning emphasized in its curriculum the study of foreign affairs. At the end of the last century, The School of Comparative Jurisprudence and Diplomacy was established to train students in "the history, service, and practice of international law and diplomacy."

In 1927, the Supreme Council of Scottish Rite Masons of Southern Jurisdiction donated one million dollars to the University for the establishment of a School of Government, to train students for both foreign and domestic Government service. Foreign affairs became a major field of study in this school.

New Faculty Appointees

Fifteen new members have been added to the University's faculty.

Clyde L. Cowan, Jr., formerly Staff Member and Group Leader at the Los Alamos Scientific Laboratory in New Mexico, was appointed Professor of Physics.

George E. McSpadden, formerly an Associate Professor at the University of Chicago, was appointed Professor of Romance Languages.

Ross P. Schlabach, formerly Feature Editor for the Columbia, South Carolina, *State,* was named Professor of Journalism and Executive Officer.

Russell B. Stevens, formerly Executive Secretary, Biology Council, National Academy of Science, National Research Council, has been appointed Professor of Botany.

Charles A. M. Hogben, formerly Medical Officer of the Section on Kidney and Electrolyte Metabolism of the National Heart Institute in Bethesda, Maryland, was named Professor of Physiology.

John E. Clayton, formerly Associate Professor, College of Business Administration, Georgia State College, has been named Associate Professor of Business Administration.

Louis Depian, formerly Assistant Professor of Electrical Engineering at the Carnegie Institute of Technology, was appointed Associate Professor of Electrical Engineering.

Jackson R. Hambrick, formerly an Attorney with the Internal Revenue Service, has been named Associate Professor of Law.

Herbert Hubben, formerly Senior Program Analyst of the Division of Organization and Personnel of the Atomic Energy Commission, was appointed Associate Professor of Public Administration.

Leonard W. Prestwich, formerly Associate Professor of Business Administration at Alabama Polytechnic Institute, was named Associate Professor of Business Administration.

Gust A. Ledakis, candidate for the degree of Doctor of Juridical Science at the University of Michigan, has been named Assistant Professor of Law.

Albert C. Murdaugh, retired Rear Admiral in the Navy and Lecturer in Foreign Affairs at the University of Virginia for the past four years, has been appointed Assistant Professor of Mechanical Engineering.

Eugene M. Renkin, formerly Senior Assistant Scientist, U. S. Public Health Service, National Institutes of Health, has been named Assistant Professor of Physiology.

Clarence W. Schimelpfenig, a specialist in Organic Chemistry, was appointed Assistant Professor of Chemistry.

John D. Snide, formerly Research Psychologist, U. S. Army Research Project, University of Pennsylvania, has been appointed Assistant Professor of Psychology.

NEW TRUSTEES

Admiral Souers

Representative Hays

The Board of Trustees of the University elected six members this year. They are: Wiley T. Buchanan, Jr., Chief of Protocol, United States Department of State; E. K. Morris, President of the Federal Storage Company; Samuel Spencer, attorney and former President of the District of Columbia Board of Commissioners; Sidney W. Souers, Rear Admiral, USNR, Chairman of the Board, General Life Insurance Company, St. Louis, Missouri, formerly Executive Secretary of the National Security Council and Special Consultant to President Truman; George E. Muth, President and Treasurer of the George F. Muth Company, Inc.; and Brooks Hays, United States Representative from Arkansas. Mr. Muth and Representative Hays were nominated for a three year term by the General Alumni Association, Mr. Muth for his first term, Representative Hays for his fourth.

Mr. Buchanan

Mr. Spencer

Mr. Muth

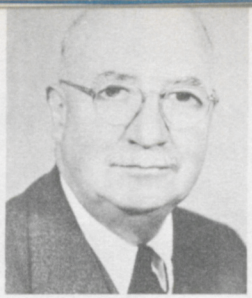

Mr. Morris

Dean Linton

Dean Doyle

Dean Van Eve

NEW DEANS

Administrative officers of the University's School of Medicine, Columbian College, and Graduate Council retired at the end of the past academic year, and new officers were appointed at the beginning of the current semester.

Dr. Calvin D. Linton, Professor of English Literature and formerly Associate Dean, was appointed Dean of Columbian College, succeeding Dean Henry Grattan Doyle.

Dr. Arthur E. Burns, Professor of Economics and former Dean of the University's School of Government, was named Chairman of the Graduate Council, succeeding Dr. Robert W. Bolwell.

Dr. John Parks, Professor of Obstetrics and Gynecology, was appointed Dean of the School of Medicine, succeeding Dean Walter A. Bloedorn.

Dr. Benjamin D. Van Evera, formerly Coordinator of Scientific Activities at the University, has been named Dean for Sponsored Research.

Previously, Dr. Van Evera's province was to act as liaison between Government, private agencies, laboratories and organizations seeking to have research done, and the professors and graduate students at the University versed in the sciences. Now he is charged with the same duties extended to all research throughout the University.

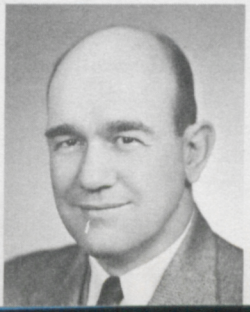

Dean Burns

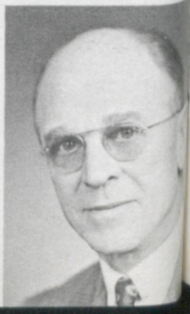

Dean Bloedorn

Dean Parks

Dean Bolwell

For University Information...

University catalogues and class schedules are distributed for use of Federal and International Employees through the following officers. If the educational counselor in your organization wishes additional information about the University, he may secure it through the University Office of Educational Counseling, Dr. Helen S. Stone, ST 3-0250, 439.

Public Affairs

The School of Government of the University is offering once again a program of study in Public Affairs leading to the degrees of Bachelor of Arts in Government and Master of Arts in Government. This program has been absent from the curriculum since World War II.

The program will provide a broad approach to the study of domestic affairs, combining the offerings of several social science departments. The major will provide for specialization in domestic economics or domestic politics.

The program includes two Political Science courses offered for the first time this fall. "Current Problems in Domestic Politics" will keep students abreast of current issues as they arise. "The Federal Executive" will examine the process of nomination and election of the President, his constitutional and political powers, the cabinet and Executive Office of the President, and the position of the President in the legislative and executive branches of the government.

Registration

Registration for the 1957 Fall Semester will be held Thursday and Friday, September 19 and 20, from 9 a.m. to 7 p.m. Law School Registration will take place in Stockton Hall, 720 20th Street, N. W. Other students will register in Building C, 2029 G Street, N. W. Classes begin September 23.

Students not registered during the preceding spring or summer term must submit to the Director of Admissions, Building C, 2029 G Street, N. W., an application for admission or re-admission. Appropriate forms are available at the Office of Admissions or may be requested by phone or mail. Applications should be filed immediately to allow ample time for evaluation.
